

Amendments to the Claims

1. (Previously Presented) A kit for organizing a plurality of images provided by a customer on a plurality of hard copy prints, comprising:
 - a plurality of labels each having machine readable code to identify a separate category of customer provided hard copy images;
 - a plurality of instruction forms each having machine-readable code to associate each of the plurality of instruction forms with a separate label and to provide information to each customer provided hard copy image associated with the separate label; and
 - at least one order form having machine-readable instructions to associate one or more of the separate category of customer provided hard copy images with at least one good or service and for ordering the at least one good or service.
2. (Previously Presented) The kit according to claim 1 further comprising instructions for the customer on how to use the kit.
3. (Previously Presented) The kit according to claim 2 wherein said instructions are provided on a hard copy document.
4. (Previously Presented) The kit according to claim 2 wherein said instructions are provided in an audio or visual format.
5. (Previously Presented) The kit according to claim 1 further comprising a holder for organizing said images obtained by scanning said hard copy prints by said service provider.

6. (Previously Presented) The kit according to claim 5 wherein said holder includes pockets for organizing said hard copy prints and associating said instruction form with said plurality of hard copy prints.

7. (Previously Presented) The kit according to claim 5 wherein said holder comprises an envelope.

8. (Previously Presented) The kit according to claim 1 wherein said plurality of instruction forms are associated with a unique order instruction.

9. (Previously Presented) The kit according to claim 1 wherein said plurality of instruction forms comprises meta-data to be applied to said images that follow each instruction form.

10. (Previously Presented) The kit according to claim 5 wherein said plurality of instruction forms includes a human readable order instruction which corresponds to said machine readable code.

11. (Previously Presented) The kit according to claim 1 wherein machine readable code is provided in the form of an icon.

12. (Previously Presented) The kit according to claim 1 wherein said kit further comprises a container for holding said plurality of images.

13. (Previously Presented) The kit according to claim 12 wherein said container is provided with at least one section for holding images provided in other formats.

14. (Previously Presented) The kit according to claim 13 wherein said at least one section is designed to hold one of the following image formats:

CD;
film cassette;
photo album;
flash card;
computer disk.

15. (Previously Presented) The kit according to claim 5 further comprising a pair of identical labels, one of said labels is used for keeping track of the pocket from which said hard copy prints were originally provided and the other of said pair of identical labels is provided on said plurality of hard copy prints that were placed in said pocket from where said hard copy prints were originally provided.

16. (Previously Presented) The kit according to claim 1 further comprising a holder having a plurality of pockets for categorizing of said plurality of images provided by said customer.

17. (Previously Presented) The kit according to claim 1 further comprising a carrier for holding one of said plurality of image for allowing automatic feeding of said one of said plurality of image through a scanning device.

18. (Previously Presented) The kit according to claim 17 wherein said carrier comprises a support surface having adhesive layer for holding of said image.

19. (Previously Presented) The kit according to claim 18 wherein said carrier further includes alignment marks for assisting in positioning said image on said carrier.

20. (Previously Presented) The kit according to claim 17 wherein said carrier comprises a retaining member located at one end of said carrier for securely holding said hard copy prints that are to be scanned.

21. (Previously Presented) The kit according to claim 1 further comprising a tool for use in determining the number of said image that is to be scanned.

22. (Previously Presented) The kit according to claim 1 wherein said machine readable code comprises a color.

23. (Previously Presented) The kit according to claim 1 wherein said plurality of instruction forms having a size substantially the same as

the size of said customer provided hard copy images associated with said plurality of instruction forms.

24-52. (cancelled)

53. (Previously Presented) The kit according to claim 1, wherein machine-readable code is interpreted by a scanning device to provide meta-data regarding one or more subsequent images.
